

WOOD HEATER

Qube 1

Stylish and functional! There are so many words we could use to describe this funky compact heater! The Qube 1's heating capacity of 9kW will heat an impressive sized area considering its compact dimensions.

This wood-burning product is also available with Multifuoco and Multifuoco System Plus as an option. This will ensure uniform heat flow from floor to ceiling, or to a ducting system is desired.

Enjoy the natural flame of a wood heater with all the efficiency and benefits of fingertip control usually only available in pellet heaters.

COLOURS

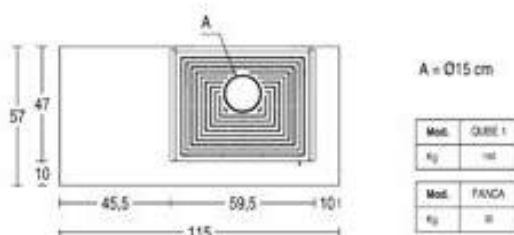

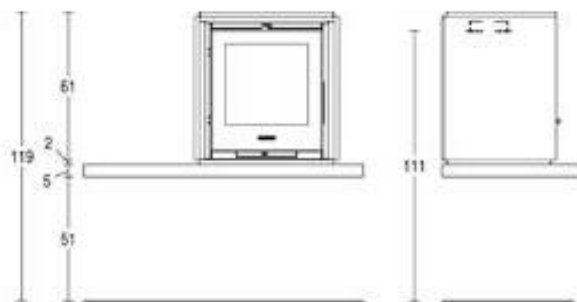

Bianco Antico Ardesia Giallo Acceso Rosso Lava Sahara

(Ardesia, Giallo Acceso, Rosso Lava & Sahara by order only)

WHAT YOU NEED TO KNOW

Wood Heaters like other heaters & stoves need to be installed by a licensed plumber or trained installer. Regular maintenance and cleaning will enhance the performance and life of your heater.

TECHNICAL DATA

- Firebox heat output kW: 9 kW
- Nominal heat output (min-max) kW: 9 kW
- Room heating capacity (min-max) m³: 150 – 260m³
- Nominal thermal efficiency %: 80.5%
- Nominal consumption (min –max) *1: 2.7 kg/hr
- Heat Diffusion: Natural radiation, convection
- Optional Multifuoco (Forced Ventilation): 4 power levels and ductable up to 10 metres
- Dimensions W x D x H cm: 59.5 x 47 x 63
- Dimension with bench: 115 x 56 x 68.5
- Stove weight kg: 180 kg with bench
- Flue cm: 15

GENERAL CHARACTERISTICS

- Cladding: Majolica
- Stove: Steel
- Firebox, Baffle Plate/Brazier: Aluker & Steel
- Door: Cast Iron
- Door Handle: Hide away & detachable
- Standard Flue Outlet Position: Top
- Primary and secondary air: Adjustable
- Preset tertiary air: Pre-heated
- LCD Digital Controls: Optional
- Ceramic Glass: Resistant up to 750°
- Glass Cleaning System: Continuous air flow
- Remote Stove SMS Texting or WIFI: Optional with Multifuoco
- Installation *2: Wall

*1 Consumption varies depending on type of wood and moisture content

*2 Please refer to instruction manual for detailed installation specifications

The modern and efficient stoves-Fireplace

Four models with clean lines and contemporary finishes with large tiled panels available in five colors to suit any environment. The hearth of the design delivers high performance and high heat output.

MULTIFUOCO SYSTEM

Perfect warmth from the floor to the ceiling.

If you install the Multifuoco® kit - the extraordinary patented ventilation system with remote control – you can ensure that heat is evenly spread throughout the room as well as in adjacent rooms with a ducting system of up to 10 metres.

MULTIFUOCO SYSTEM PLUS

Innovative electronic control

Optional forced ventilation kit with four electronic controlled power levels and LCD remote control. Warm air ducting up to 10 m

TERTIARY AIR SYSTEM

Better performances.

The preheated tertiary air system, in many models, fully optimizes combustion and ensures high efficiency with low emission into the atmosphere.

GREAT PERFORMANCES

Excellent heat output.

The particular structure of the stove and the large radiant surface area ensure a high heat output and therefore an ideal level of comfort in your home.
